

BUSINESS DEVICES THAT ARE A CLASS APART

The mid-range ThinkPad L Series offers enterprise docking, enhanced security features and optional remote management capabilities.

ThinkPad L13

Smarter
technology
for all

Lenovo

This productivity notebook has a compelling new design with a 35% reduction in the width of the frame around the screen, and one of the thinnest and lightest designs in its class. With more privacy and security features than most competitors – an integrated webcam cover, optional match-on-chip fingerprint reader, IR camera and smart card reader – it's designed for enterprises that want to secure their endpoints and boost the productivity of their users.

REASONS TO BUY

Mobile users need a device that won't easily run out of power; this laptop lasts up to 14 hours on a single charge with option to recharge to 80% capacity in just 60 minutes.

The legendary ThinkPad keyboard offers precise feedback with each keystroke, while the famous red trackpoint and 3-button clickpad provides users more options for using the device while on the move.

Minimal preloaded applications mean maximum battery life and responsiveness for users, and faster deployment for IT admins.
